First International Congress on Models, Optimization and Security of Systems
(ICMOSS'2010)
May 29-31, 2010, Tiaret, Algeria

Ibn Khaldoun University of Tiaret, Computer Science Department is organizing an international conference in Computer Science from 29 - 31 May 2010. This conference concerns both the national and international scientific community and will be primarily focusing on Systems Security and Models. Systems will be utilized in different applications for example, Web technologies, Information Systems, Decision Systems, Embedded Systems, Control-command Systems and Real-time Systems. All these frameworks are discussed using the models mentioned previously. Security Notion was taken into account in the earlier phase of explaining System models; this generates important implications during the adaptation and optimization of systems implementation. It becomes difficult to resolve these implications when the solution is implemented on a hardware framework. The aim of the initial conference is to explore issues relating to the security aspects during the initial phases of systems specifications. The fundamental aim of the congress is explore Systems Security and Models Optimization and their interaction. We welcome novel research surrounding the above subjects. In addition formal methods and tools that deal with the subject will also be welcomed. Topics of interest include, but not limited to:

- Formal methods,
- Component approaches,
- Information systems,
- Web services,
- Web Technology,
- System security,
- Biometric,
- Pattern recognition,
- Cryptography,
- Embedded systems, Soc,
- Real-time systems,
- Control-command systems.

Honourable chair of the Congress

Nasreddine HADJ ZOUBIR- Head of University of Tiaret – Algeria

Honourable co-chair of the Congress

Rachid BAGHDAD - Dean of sciences and engineer sciences faculty - University of Tiaret – Algeria
