## 1. Main theme of the international conference

Modern information and communication technology is one of the most important factors contributing to the process of social change, and the main architect of the process of human societies, where technology made history and contributed to the construction of human civilizations . The invention of printing press transformed the nature of social construction which structured a new communication society that depends on printing press as a way to break free from restrictions. The emergence of Electronic Communication Technology (Radio, Television) has transformed human civilization from written to Audiovisual. The world has become small village according to "Marshall Macluhan" and the emergence of The Internet brought major communication revolution that changed the patterns of : communication, economy , politics , thought , relations , science, philosophy and social ... , and the Internet produced new societies with different characteristics. With the integration of the Internet within Modern Information and Communication Technology , societies now are keeping up with the age of knowledge, digitization and speed , this is what we call Social Mobility, the Modern Information and Communication Technology is interfering with the redrawing of the whole societal systems : communication , political , cultural , economic , social and conceptual ... , therefore we try through this International Conference to discuss the mechanisms, strategies and ideological backgrounds adopted by Modern Information and Communication Technology in making social change with attempt to dissect the Arab situation in particular.

## 2. The importance of the international conference

Conference and scientific forums are open research spaces to discuss various issues that require analysis to reveal the relationship between the different variables of this conference's phenomenon Therefore , this International Conference on Modern Information and Communication Technology and the mechanisms of social change has an importance at different levels : academic , political , social , economic , cultural ... , where its themes will take us to different scientific fields : communication , media , social , political, psychological , economic , anthropological ... in order to present day issues and try to uncover the most important , mechanisms , strategies and politics adopted by Modern information and Communication Technology that made major local and international social changes.

## 3. The Conference's Objectives

1. To reveal the interrelationship between Modern Information and Communication Technology and the Mechanisms of social change
2. Modern Information and Communication Technology has changed the nature of human communication, so we try through this conference to scrutinize and search for objectives and the hidden effects of this technology
3. Identify the specificity of the Arab and Algerian public space and its relation with Modern Information and Communication Technology
4. Try to explain the political transformations locally and internationally in The Modern Information and Communication Technology
5. Encouraging scientific research in broadcasting in such subjects as well as exchange experiences and benefit from the different researcher's results
